

Is your forklift licence up to date?

Do you operate a forklift or employ people that operate them in your business?

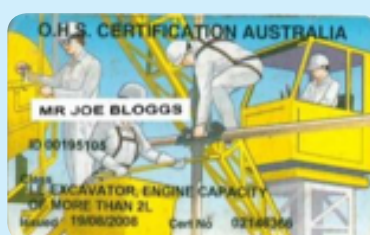

WorkSafe Victoria now classify operating a forklift as high-risk work.

Previously, when you obtained your forklift licence it never expired, however to operate a forklift you must now hold a high-risk work licence, and these must be renewed every five years.

What does your current licence look like?

Check your expiry date - this is the current high-risk work licence and it must be renewed every five years.
If your licence looks like this and it has not expired, no action is required.

If your licence looks like this, under Victorian law you will be required to complete a high-risk work licence training course and pass a competency-based assessment to receive your forklift licence and legally operate a forklift.

NO CURRENT LICENCE

Under Victorian law you will be required to complete a high-risk work licence training course and pass a competency-based assessment to receive your forklift licence and legally operate a forklift.

To help ensure all Market forklift drivers are compliant, the MMA have engaged our training partner, Melbourne Polytechnic, to deliver forklift licence training courses on-site at the Market for your convenience.

Melbourne Polytechnic Course Structure

Participants have the option of either morning or evening course options with the course spread over four days. Each 'class intake' runs from Thursday to the following Wednesday with a total of 11.5 hours of training and assessment for each person.

Morning Option
